

Soil Slime Lab

Materials Needed:

- Small disposable cup
- White Glue
- Liquid Starch
- Popsicle sticks
- Small Beads
- Food Coloring (optional)

Procedure

- Collect all your materials. To begin, students will need one cup
- Add 1/4 cup of white glue to the cup. If you want to make your slime colored, add the food coloring of your choice now and mix with a popsicle stick
- Add 3 1/2 teaspoon of liquid starch to the glue.
- Add the beads before you mix together
- Using the popsicle stick, mix everything together until the correct consistency
